Bekasi, West Java, Indonesia

Information Technology Student at President University with expertise in Full-Stack Web Development, Cybersecurity, and AI Integration. Proficient in building modern web applications using React, Next.js, Laravel, TypeScript, and SQL-based databases. Experienced in designing responsive user interfaces, developing scalable backend services, implementing secure coding practices, and integrating AI-powered solutions. Demonstrates strong problem-solving abilities, continuous learning mindset, and a passion for delivering impactful technology solutions.

Experiences

ASHAR GROSIR PARFUM - Bekasi, Indonesia Dec 2025 - Present

Full Stack Developer

B2B perfume wholesale distributor providing fragrance oils, bottles, and business supplies for resellers across Indonesia.

- Architected a scalable Next.js B2B web application from scratch, creating an integrated online catalog to streamline wholesale operations for 50+ active resellers and 600+ products.
- Engineered an internal Laravel ERP dashboard with 5+ payment gateways to manage automated revenue tracking, inventory synchronization, and daily customer data.
- Designed secure core database schemas with a 5-role Role-Based Access Control (RBAC), reducing manual financial data reconciliation time by 60% and improving data integrity.
- Optimized Cloudflare CDN layers and dynamic queries, cutting mobile load times by 40% with 34% cache efficiency and 99.9% uptime while integrating GA4 technical SEO.

GAOTEK INC - New York, USA (Remote) Apr 2026 - Present

Web Development Intern (Remote)

- Optimized enterprise web infrastructure to support high performance and reliability for platforms hosting 1,000+ international ICT virtual summit attendees.
- Maintained a 100% on-time milestone delivery rate across project tracks by delivering structured technical progress reports during daily agile scrum stand-ups.
- Audited documentation and verified security compliance across 15+ cloud staging environments, while troubleshooting frontend workflows to improve load times by 15%.

Education

President University - Bekasi, Indonesia Aug 2024

Bachelor of Information Technology, 3.54/4.00

- ColonyAI: Built Next.js/FastAPI automated Plate Count Reader using YOLOv8 (94.1% mAP) and OpenCV with zero-trust security (Argon2, SHA-256) for ISO 17025.
- Risk Shield System: Developed Next.js/Supabase GRC platform automating OCTAVE Allegro with interactive 5x5 Heatmap and Gemini Pro AI security auditor.
- Surjob AI: Engineered Cloud Run serverless platform using Gemini API and Firebase for labor law risk mapping and dynamic legal document generation.
- ThinkTopia: Designed and programmed an interactive web education platform containing 50+ learning materials and gamified quizzes for elementary students.
- GORAKO Project: Acted as project leader to educate 100+ high school students regarding sustainable waste management and environmental awareness.

Organizational Experience
