Bekasi, West Java, Indonesia

Full-stack engineer and Information Technology student who ships production systems for real businesses and explains them clearly to non-technical stakeholders. Works independently and in team repositories: scopes requirements, makes architecture and security decisions, deploys and operates the servers. Builds internal tools, payment and messaging integrations, and AI agent systems, using AI-assisted tools such as Claude Code with human review of every output. Strong communicator who presents and demos solutions to management and end users.

Pendidikan

President University - **Bekasi, Indonesia** Sep 2024 - Dec 2027 (Perkiraan)

Bachelor of Information Technology, 3.54/4.00

- Vice of Art & Sport Division, PUFA Computer Science. Member of PUMA Informatics. Led the GORAKO community project educating 100+ high school students on environmental awareness. Participated in software engineering projects and national hackathons.

Experiences

PT Grahabuana Cikarang (Jababeka) - **Cikarang, Indonesia** Aug 2026 - Sekarang

Software Engineer Intern

- Built internal applications for the Jababeka industrial estate and led development in team GitHub repositories (130 of ~136 commits on the booking platform and 157 of 159 on the PDF toolkit).
- Developed a Water Meter Management System (React 19, Laravel 12, JWT) as a mobile PWA that replaces the paper meter log and the re-typing of readings into the central dashboard: field officers capture the reading and a meter photo with the camera, automatic OCR reads the digits (manual entry as fallback), and data feeds interactive maps, per-cluster dashboards, and monthly CSV reports. Documented a 29-endpoint OpenAPI contract for integration with the central system.
- Developed the Jababeka Industrial Visit booking platform (React, Express, MySQL) covering the full booking lifecycle: package selection, Xendit down-payment and settlement invoices with webhooks, automatic invoice and official PDF voucher delivery by email and WhatsApp, and an admin backoffice with three access roles, audit trail, and scheduled backups with SHA-256 checksums.
- Created PDF Toolkit Jababeka (Next.js 16, TypeScript, Docker): 30 document tools (merge, split, compress, convert to and from Word, Excel, and JPG, edit, watermark, redact, password protection, OCR) in one internal app that processes files on the user's device so confidential documents never leave the computer; covered by 87 automated tests.
- Collaborated through pull requests and code review, wrote deployment and troubleshooting documentation, and demonstrated features to stakeholders.

ASHAR GROSIR PARFUM - **Bekasi, Indonesia** Dec 2025 - Sekarang

Full Stack Engineer

- Independently designed, built, and operate the company's entire digital stack: an internal POS/ERP (Laravel 12, PostgreSQL) with a millilitre-based stock ledger that prevents overselling, shifts, returns, wholesale notes, staff attendance, and an AI assistant that queries live store data, plus a public e-commerce storefront with AI chatbot (Next.js 16, Supabase), about 75,000 lines of code across 500+ commits.
- Automated orders, stock synchronization, expense tracking, and financial reporting for 100+ daily transactions, reducing manual reconciliation time by 60%.
- Own the infrastructure and DevOps end to end: Linux VPS (Nginx, PM2, Docker, GitHub Actions CI/CD), Cloudflare WAF and Bot Fight Mode mitigating 22K+ malicious requests per month, 310K+ requests served at 99.84% origin reachability and 0.15% 5xx error rate.
- Built a technical SEO and AI-search visibility system (structured data, crawler access rules, entity consistency) and reached Lighthouse 96+ Performance, 98+ SEO, 1.34 s average page load, and 91% "Good" LCP.

GAOTEK INC - **New York, USA (Remote)** Apr 2026 - Jul 2026

Web Development Intern (Remote)

- Developed and customized responsive WordPress websites using PHP, HTML, CSS, JavaScript, Elementor, and Gutenberg within a local XAMPP development environment.
- Maintained and updated WordPress websites by publishing content, optimizing page layouts, troubleshooting technical issues, and applying SEO best practices to improve usability and search visibility.
- Collaborated in an Agile remote environment by participating in weekly technical discussions via Microsoft Teams and consistently submitting progress reports throughout the internship while delivering assigned development tasks on schedule.

Organizational Experience

PUMA Informatics – President University - **President University, Bekasi, Indonesia** Sep 2024 - Aug 2025

Member – Students Passion & Talents Division

- Organized 3+ technology-focused events for 100+ university students, achieving a consistent 95% attendance rate.
- Coordinated technical academic workshops and student activities aimed at fostering peer-to-peer collaboration.
- Supported divisional logistics and knowledge-sharing initiatives to enhance student skill development in IT.

PUFA Computer Science – President University - **President University, Bekasi, Indonesia** Sep 2025 - Sekarang

Vice – Art and Sport Division

- Led 5+ art and sports activities for 60+ students, resulting in a 40% increase in departmental student engagement
- Led cross-functional committees to organize campus events attended by over 100 students while coordinating volunteers, schedules, and logistics.

Skills, Certifications & Achievements

- **Technical Skills**: Languages: TypeScript, JavaScript, Python, PHP, Golang, C# | Frameworks: React, Next.js, Laravel, ASP.NET Core, Node.js/Express, FastAPI | Databases: PostgreSQL, MySQL, SQLite, SQL Server, Supabase, Redis, vector/semantic search
- **AI Agents & LLM Engineering**: AI agents via API (Anthropic, Gemini, OpenAI-compatible providers), tool-calling, knowledge bases and RAG, multi-provider routing with failover, semantic caching, prompt engineering, MCP (Model Context Protocol), Claude Code, OCR, YOLOv8, OpenCV
- **Security & Penetration Testing**: Vulnerability scanning and exploitation testing (external and internal) with Kali Linux and [ISI: tool Kali yang benar-benar Anda pakai, mis. Nmap, Nikto, SQLmap, Metasploit, Gobuster, ffuf, Hydra, Wireshark], Burp Suite for web and API testing, structured vulnerability reports (severity, reproduction steps, remediation), responsible disclosure, OWASP Top 10, Zero-Trust, RBAC, OCTAVE Allegro, hardening (CSP, rate limiting, SSRF protection, audit logging)
- **Cloud, Server & DevOps**: Google Cloud Console (Cloud Run), Cloudflare (WAF, Bot Fight Mode, DNS, CDN, SSL, Turnstile), Linux server setup and firewall hardening, Nginx, PM2, Docker, GitHub Actions (CI/CD), Vercel, FirebaseCloud, Server & DevOps:
- **Systems Integration:**: REST APIs, webhooks, payment gateway (Xendit), WhatsApp and email gateways, Telegram bots, Google Sign-In, OpenAPI specifications
- **Web Analytics & Search**: Google Search Console, Google Analytics (GA4), Google Tag Manager, technical SEO, structured data, AI-search visibility, Core Web Vitals
- **Collaboration & Communication**: Git/GitHub pull requests and code review, Clickup, Jira, technical documentation, stakeholder demos and presentations, team leadership
- **Certifications**: Software Engineer Certificate and Frontend Developer (React) – HackerRank; AWS Cloud Practitioner Essentials and AWS Technical Essentials – Amazon Web Services; Google Analytics and Google Ads Search Certification – Google; HubSpot Data Integrations Certification; Belajar Dasar Pemrograman Web – Dicoding
- **Responsible Disclosure** (2026): Identified and responsibly disclosed a security vulnerability in NVIDIA's infra-controller where the BMC administrator password was exposed through an ipmitool command-line argument. The issue was validated by NVIDIA and remediated within 48 hours.
