Bekasi, West Java, Indonesia

Full-stack developer & cybersecurity enthusiast building scalable web platforms; digitized B2B operations for a legacy wholesale database of 15,000+ partners.

Work Experiences

ASHAR GROSIR PARFUM - Bekasi, Indonesia Dec 2025 - Present

Full Stack Developer

Perfume distributor providing fragrance oils, perfume bottles, and business supplies for resellers and entrepreneurs across Indonesia.

- Developed a secure B2B digital catalog and lead generation platform for a wholesale database of 15,000+ partners, integrating WhatsApp-based ordering to streamline transactions.
- Optimized database queries via indexing and system architecture, improving page load performance by ~40% on mobile devices and ensuring system stability during peak traffic.
- Implemented an AI-assisted admin system that reduced manual stock audit time by ~60%, streamlining internal operations and minimizing human error in inventory management.

Syntecxhub - Remote Mar 2026 - Apr 2026

Web Development Intern (Remote)

Technology company providing internship programs and real-world project experience in web development, UI/UX, data science, and software engineering.

- Developed three React applications (Expense Tracker, Weather App, Notes App) using React hooks including useState and useEffect.
- Integrated external APIs and localStorage for dynamic data management and persistent application state.
- Published project repositories on GitHub and completed structured weekly development tasks in a remote internship program.

LexCorpus Law - Bekasi, Indonesia (Remote) Jan 2026 - Present

Full Stack Web Developer

Legal education platform providing legal articles, regulatory analysis, and professional legal knowledge resources.

- Developed a legal education platform using Next.js, TypeScript, and Supabase for publishing legal articles and research resources.
- Built membership and content management features to manage structured legal education materials.
- Deployed the production website lexcorpuslaw.com and optimized performance for public legal knowledge access.
- Implemented server-side rendering (SSR) to enhance SEO and security for legal article distribution.
